

ARTIFACT

STEAMBassadors Redesign Sitemap + Page Concepts

Content architecture and responsive page direction

Shows how the redesign follows the current site map while restructuring eligibility, mission, FAQ, resources, and application content into clearer page-level blocks. Use this as the bridge between research findings and visual design decisions.

Portfolio use

Place this under a case-study section like "Workflow Mapping" or "Information Architecture" and pair it with one short paragraph explaining what changed because of this artifact.

Suggested caption

STEAMBassadors Redesign Sitemap + Page Concepts: a working UX artifact used to clarify user roles, handoffs, decision points, and content requirements before moving into interface design.
